PROJECT PROPOSAL

1. **Project Name:** CatchUp

Project Nature: Website

Scope:

Are you always procrastinating? Are you someone who's late in finishing your tasks? Fear no more, because now you'll have all your worries sorted with our scheduling website, CatchUp, which will help you manage and track your assignments and quizzes. Our management system will provide you with features that will range from alerting you when a new task is uploaded. It will also sort your schedule for you on the basis of task submission in priority. You can also track your progress, visually with the help of a graph. Now you'll never miss an upcoming event because you can view and edit your custom calendar with all your essential dates highlighted.

2. Requirements:

Sign up:

Users will be able to sign up manually using the desktop application by providing a series of specific user information. information will include the first name, middle name, last name, date of birth and gender. Users can then set their username and password to complete the setting up of the account.

Login:

The user can log in to his/her account using the created account. They will be able to change passwords by re-entering the old one and then setting a new password, or if forgotten, they can change passwords by entering the backup code.

Profile:

The profile will display basic information about the user. This information can be edited by the user at any time. Information will include First name, middle name and last name, Date of Birth in the form of day/month/year, Gender: Male, Female, and Other.

Assignment, and Quizzes:

Users can store and keep track of their due dates. They can upload their assignment and quizzes dates in the format day/month/year. They can add the topics off the assignments/ quizzes so they know which topic to prioritize. Additional space will be given to add further notes regarding the assignment/quiz. A separate input will be taken by the user for their obtained marks in said assignment or quiz.

Calendar:

Users can set their important dates by marking them on the calendar.

Mark Graph:

The mark graph will be in the form of a bar graph and the user will be able to see their overall mark statistics. The graph will show the statistics monthly and the user will be able to select which month they want to view.

3. Features:

- Signup
- Login
- Assignment and Quizzes
- Calendar
- Mark Graph

Additional Features:

- Extra Curricular: Users can highlight their important events and meeting dates in their calendar
- Sorting: Tasks will be arranged on the basis of their due dates

Constraints:

- Users can only log in if they are signed up.
- Our website will work on all of the major web browsers like (Google Chrome, Mozilla Firefox, Safari e.t.c.) which support the latest technologies.
- Internet speed more than 3G is preferable for a better experience.
- Mobile phones, tablets, desktop computers, and laptops are preferable to access.
- If your system does not meet the above requirements our website will not work.

4. Modular Breakdown:**Iteration 1:**

- Signup:
- Login:
- Assignment and Quizzes: (Users can only store their task due dates)

Iteration 2:

- Profile

- Calendar implementation
- Sorting
- Different interfaces

Iteration 3:

- Extra Curricular
- Mark graph

5. Roles:

ROLES	NAMES
DESIGN	
TECHNOLOGIES	ALI HAMZA
FLOW OF WEBSITE	MUSA, AIYZA, MUNEER
DEVELOPMENT	
FRONT END	ALI HAMZA, AIYZA
BACK END	MUSA, MUNEER
TESTING	
EFFICIENCY	MUSA, MUNEER

WORKING	ALI HAMZA, AIYZA

==*-- THE END --*==
